**DETAILED ACTION*****Request for Continued Examination***

1. The request filed on Feb. 13, 2004 for a Request for Continued Examination (RCE) under 37 CFR 1.114 based on Application No.10/052,406 is acceptable and a RCE has been established. An action on the RCE follows.

***Drawings***

2. The drawings were received on Jan. 02, 2004. These drawings are approved by Examiner.

***Allowable Subject Matter***

3. Claims 1-2 and 4-23 are allowed (Claim 3 is canceled by Applicant).

4. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 1-2 and 4-12 is the inclusion of the limitations of a first plurality of antenna elements having a first set of element dimensions for operation on a first band of frequencies and having a second set of element dimensions selected for operation on a second band of frequencies. The second band of frequencies is substantially adjacent to the first band of frequencies to facilitate wideband operation. It is these limitations found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 13-18 is the inclusion of the limitations of the first and second feed organizers arranged in a common grid pattern and extending upward toward the first and second plurality of antenna

elements and wherein a plurality of RF feeds of the second feed organizers form a second feed organizer grid pattern interposed on the common grid pattern. It is these limitations found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 19-23 is the inclusion of the limitations of a second plurality of planar antenna elements comprising elongated second body portions and enlarged width second end portions connected to correlating ends of the second body portions, and the second end portions of adjacent ones of the second antenna elements comprising interdigitated portions. It is these limitations found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
